

Round-the-clock protection for one of Russia's alcoholic beverage powerhouses

Tatspirtprom secures its digital future with Kaspersky MDR cybersecurity in 24x7 mode

Founded in

1997

The company is ranked among the top-3 vodka producers in Russia

Its products have repeatedly earned recognition in both the “Top 100 Products of the Republic of Tatarstan” and the “Top 100 Products of Russia.”

JSC Tatspirtprom

Tatspirtprom is the largest vodka producer in the Russian Federation*. Its operations include production plants and a logistics center.

The company manufactures a wide range of alcoholic beverages, including Alpha-grade spirit, and offers products across all price segments. Its brands are available in every region of the Russian Federation, with exports and contract manufacturing actively expanding.

In addition to its own brands, Tatspirtprom continues to develop partnerships with major retailers under private labels.

The company is experiencing strong, sustained growth, supported by:

1

3,500+ employees

2

5 production facilities

3

Presence in all regions of the Russian Federation

k

Long-term partnership

Tatspirtprom has been working with Kaspersky since 2020. The company's infrastructure uses endpoint protection products, including Kaspersky MDR.

The importance of cybersecurity

Like many enterprises, Tatspirtprom recognized the need to digitally transform its business. While basic endpoint protection was in place, the company lacked the resources and expertise to investigate and respond to advanced threats that bypassed automated defenses. Strengthening cybersecurity capabilities quickly became a top priority. As the largest vodka producer, with extensive production and logistics operations, Tatspirtprom made data confidentiality and integrity central to securing its supply chain.

**Kaspersky
Managed Detection
and Response**

Benefits of Kaspersky MDR

- Confidence that your business is under constant protection
- Optimized security costs by removing the need to hire additional cybersecurity specialists
- Access all the main benefits of a Security Operations Center without having to establish or maintain one in-house
- Fast deployment and easy monitoring via a user-friendly management console

CIO of JSC Tatspirtprom

Expanding the partnership

Tatspirtprom is committed to excellence across all areas of operations, and cybersecurity is no exception. After evaluating the market for 24/7 protection, the company chose Kaspersky, prioritizing vendor expertise and strong recognition from both analysts and customers in Russia and internationally.

A previous positive experience with Kaspersky also influenced the decision. Tatspirtprom first implemented Kaspersky Endpoint Security for Business in 2020, and in 2022, expanded its protection with Kaspersky Managed Detection and Response. **Kaspersky MDR** provides round-the-clock protection against advanced threats that evade automated tools. Its detection and response capabilities are powered by one of the industry's most experienced threat hunting teams. Deployment was quick and smooth.

Outcome

Kaspersky MDR helped Tatspirtprom identify infrastructure vulnerabilities and strengthen its information security systems within a short time and without disrupting business processes. The company highlights 24/7 monitoring and prompt feedback as the most important and valuable aspects of the service. In addition, employees are building their knowledge and skills through ongoing interactions with Kaspersky SOC analysts. Looking ahead, Tatspirtprom plans to expand the partnership, including potentially implementing Kaspersky's SD-WAN solution.

Choosing Kaspersky MDR was a smart move for us because it helped us protect our assets without compromising how we work. The 24/7 threat hunting by their expert SOC gives us real peace of mind, and the team's ability to work directly with our IT staff in real time has been incredibly valuable. It's also surprisingly cost-effective. What impressed us most was how easy it was to get started - deployment took less than five minutes. Based on the results so far, we're already looking at ways to extend the partnership.
