

# Kaspersky Next XDR Expert

Accelerate threat detection, automate response and real-time visibility with a superior XDR solution.

# Existing challenges and threats to an organization's information security

To combat sophisticated targeted attacks, cybersecurity personnel must manually analyze and assess a large number of incidents. Additionally, they must use information security tools that are managed via separate consoles.

This lack of a consolidated view of information leads to poor decision making, while the volume and complexity of attacks, the expanding attack surface, and the global shortage of skilled cybersecurity professionals make it difficult to stay ahead of the adversary.

XDR's ease of use in detecting common threats **reduces the need for in-house expertise and reduces the manpower required to operate disparate XDR components from different vendors.**

# About Kaspersky Next XDR Expert

The ultimate cybersecurity tool for proactive defense against cyberthreats

As the most advanced tier of the Kaspersky Next product line, we offer a robust cybersecurity solution that defends against sophisticated cyberthreats, providing full visibility, correlation and automation, leveraging a diverse range of response tools and data sources, including endpoint, network and cloud data.

Easy to deploy and manage, Kaspersky Next XDR Expert is backed by advanced analytics capabilities and a strong track record of security expertise. We offer an Open XDR solution with an **Open Single Management Platform** – the next step in the evolution of Kaspersky Security Center.

At the core of Kaspersky Next XDR Expert is the functionality of our leading solutions – Kaspersky Unified Monitoring and Analysis Platform (SIEM), Kaspersky Next EDR Expert, Kaspersky Hybrid Cloud Security and Kaspersky Security for Mail Server. In addition to the above products, other integrations can be added on demand (NDR, OT, TI, Awareness, etc.).

Besides the main Kaspersky Next XDR Expert offering, **our solution is also available as Kaspersky Next XDR Core**:

#### Kaspersky Next XDR Expert

combines best-in-class endpoint protection, mail and hybrid environment security with the advanced detection capabilities of Kaspersky Next EDR Expert, a correlation engine and automated responses. Third-party connectors can be added to pull all the data together.

#### Kaspersky Next XDR Core

is for customers who already have endpoint and EDR solutions in place and don't want to repurchase them, preferring to extend the functionality with a correlation engine, automated responses and third-party connectors.

#### More features

The solution comes with dashboards and reporting, Open API, deployment toolkit, 50 free Threat Lookup requests, as well as monitoring and response capabilities in hybrid cloud environments and corporate email networks. Upon request, the solution can be integrated with a range of Kaspersky or third-party solutions: NDR, OT, Threat Intelligence, Security Awareness and more on demand.

# Breakdown of functionality

The solution covers the following areas of cybersecurity out of the box:

Automated protection of physical and virtual endpoints from mass threats

Advanced detection and response to complex threats at the endpoint level

Cross-correlation engine for data collection, normalization, monitoring and correlation

Incident response and case management

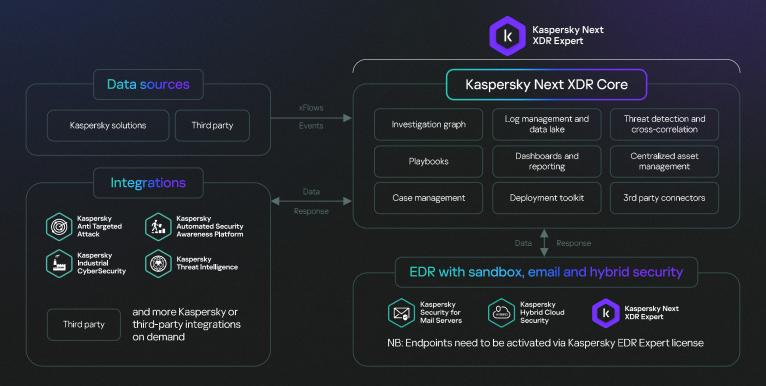

Investigation and proactive search

Response automation and orchestration

### Solution architecture

Act quickly and make the right decisions using the best security products, seamlessly integrated into Kaspersky Next XDR Expert.

## Why choose us?

Reduce total cost of ownership with a scalable solution based on modern technologies such as microservices and REST API.

Our stack of technologies for both industrial and corporate sectors allows us to provide Single IT-OT XDR.

We are one of the few vendors that can offer data sovereignty without compromise with our on-premises installation.

We have 200+ preconfigured integrations and we are adding more. With built-in integrations we can receive data from various solutions.

Seamless and tight integration between Kaspersky products reaches a level unattainable by third-party solutions.

To ensure XDR covers all stages from prevention to investigation, we have built our solution on top of the best-in-class Kaspersky EDR.

Kaspersky Extended Detection and Response (XDR) has received Leader status from ISG (Information Services Group) for the second year in a row, reaffirming its technological excellence and ability to combat new and complex threats.
