

# Essential Installation Service

For Kaspersky Next XDR Expert

Kaspersky Essential Installation Service delivers a structured, controlled deployment of Kaspersky Next XDR Expert.

It enables enterprises to rapidly establish an operational XDR capability with predefined scope, predictable timelines, and minimal disruption to existing security operations.

**Kaspersky  
Professional  
Services**

Essential Installation Service is part of the Kaspersky Professional Services portfolio, which provides expert support to implement and optimize Kaspersky solutions.

## Service scope & coverage<sup>1</sup>

The service is delivered remotely by Kaspersky engineers within 15 labor days<sup>2</sup>.

Deployment of 1 OSMP<sup>3</sup> worker server for XDR orchestration and integration

Deployment of Kaspersky SIEM services (collector, correlator, storage)

Connection to 7 event sources

Integration with 3 Kaspersky solutions or infrastructure services

## Key stages

1

### Kick-off & scope confirmation

Checklist completion and scope confirmation.

2

### Platform deployment

Installation of OSMP and SIEM components, core system configuration .

3

### Basic security configuration

Kaspersky endpoint protection rollout.

4

### Integration phase

Connection of event sources, initial detection tuning.

5

### Post-implementation

Functional verification, knowledge transfer to IT teams.

## Outcome & deliverables

Fully deployed and configured Kaspersky Next XDR Expert environment

Knowledge transfer for ongoing operation and maintenance

Operational validation and completion report

This service minimizes deployment risk and shortens SOC time-to-value by delivering an operational XDR rollout with integrated detection and response capabilities, controlled scope, and predictable implementation.

<sup>1</sup> Service applies to current supported versions of Kaspersky Next XDR Expert.

<sup>2</sup> For advanced integrations, custom configurations, or extended deployments, Essential Installation Service can create a tailored proposal.

<sup>3</sup> The service implements Kaspersky Next XDR Expert built on the Open Single Management Platform (OSMP), enabling unified control across Kaspersky and third-party security tools.
